People to People Citizen Ambassador Program

Dr. Abdul Razzak Rumane Senior Member IEEE (USA) and former Chairman, IET, Kuwait Chapter has been invited to participate as a member of the Electrical, Electronics and Computer Engineering delegation under the auspices of People to People Citizen Ambassador Program, which shall be lead by Dr. Robert A. Hanna, past president of IEEE, Canada (2006-2007) and director of IEEE – Region 7. The delegation specializing in electrical, electronics and computer engineering will convene in India in October 2010.

People to People International is a non political, private sector organization dedicated to promoting international peace and understanding.

It was founded in 1956 by President of USA Dwight D. Eisenhower, as a vehicle to expand international relations beyond the structure of government agencies. President of USA is an honorary Chairman of this organization. As a Citizen Ambassador, each delegate will represent hi/her profession while continuing the tradition of high-level professionals who have shaped, over the past 50 years, international dialogue within their profession.

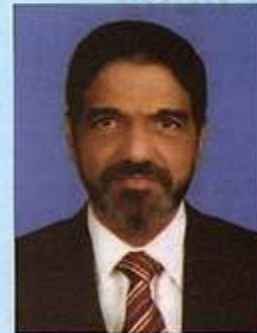

The topics of discussions will mainly focusing on: Philosophies about the renewable energy and interface challenges with the grid. Research and development of renewable energy, particularly wind and solar power. Application challenges to

meet electricity demand using renewable energy.

End user experience with reliability and performance of electrical equipment used for generating wind and solar power.

The inclusion as a delegate member is consider as recognition of professional expertise and a great honour for the members. The program has international importance promoting bilateral exchange, international peace and understanding. The delegation consists of professionals from eight countries around the world.

Dr. Rumane is a celebrated engineer having received various awards and medals. He has Ph.D with disseration "Quality Engineering Applications in Construc-

tion Projects" from Kennedy Western University, USA and was awarded Honorary Doctorate by The Yorker International University in Italy. His book titled "Quality Management in Construction Projects" being published by CRC Press (A Taylor & Francis Group Company), Florida, USA will be shortly available globally."
